

PAINTS & COATINGS

STYRENE-ACRYLIC EMULSION (45% / 50%)

Styrene-acrylic emulsion is an acrylate-based copolymer emulsion suitable for architectural interior and exterior decorative coatings.

PURE ACRYLIC EMULSION (50% / 55%)

Pure Acrylic Emulsion is used for interior and exterior decorative paints. Acrylic emulsion based paints gives better sheen and better dirt pick-up resistance.

PIGMENT PASTE

Pigment Paste is highly dispersed suspension of pigments. We offer Black, Yellow, Red, Blue, Green Pigment Pastes. Major application is for water based architectural coatings in interior & exterior wall latex paints.

DISPERSING AGENT

We offer Ammonium based & Sodium based dispersing agents suitable for all emulsions, such as homo polymer and copolymer polyvinyl acetate, poly acrylic and styrene/acrylic copolymer emulsion. These are suitable for high pigment loading paints.

STYRENE-ACRYLIC EMULSION (56%)

Styrene Acrylic Co-polymer emulsion with high solids suitable for 2K water proofing application and flexible sealing slurries

THICKENER

We offer HASE thickener for aqueous paints with superior thickening property. It acts as partial replacement for HEC and offers better Rheology properties at lower dosage.

COALESCING AGENT

We offer Coalescing Agent that improves scrub resistance, better colour stability, low evaporation rate, better weather resistance, improved hardness.

TITANIUM DIOXIDE

We offer various grades of TiO₂ suitable for applications such as paints, master batches etc.
