

PETROCHEMICALS & POLYMERS

TOLUENE

Toluene is a clear, colorless liquid used mostly as a solvent for paint, in addition to adhesives, inks and pharmaceuticals.

MIXED XYLENE

Mixed xylene is used as solvent for paint and pesticide. It is also a raw material for orthoxylene (phthalic anhydride), metaxylene (isophthalic acid), paraxylene (terephthalic acid) and ethylbenzene (styrene monomer).

ISO PROPYL ALCOHOL

Isopropanol or isopropyl alcohol is a clear, colorless liquid that is a major component of rubbing alcohol as well as regular household items such as cleaners, disinfectants, and hand sanitizers; it also can be found in pharmaceuticals.

PHENOL

In industry, phenol is used as a starting material to make plastics. Phenol is used primarily in the production of phenolic resins and in the manufacture of nylon and other synthetic fibers.

ETHYLENE AMINE (DETA / TETA / ETC.)

Ethyleneamines are water soluble and slightly viscous liquids with ammoniacal odor and chemical reactivities. Ethylene Amines are used in the Chemical, Agricultural, Pharmaceutical, Paper and Paint industries.
